

New Heathrow office for Crane Worldwide Logistics

Global logistics provider Crane Worldwide Logistics has invested in a new warehouse adjacent to Heathrow airport, enhancing their presence in the UK market.

The new facility, measuring 34,000 square feet, will offer increased warehouse space and improved capabilities such as e-commerce support, pick and pack operations, labelling, as well as catering to customers' bespoke handling requirements.

"Having outgrown our current premises, the new facility at Heathrow enables us to build upon our existing capabilities and allows the team to provide further value added services to our portfolio," Jason Stretton, Country Manager for the UK and Ireland, said.

"Crane Worldwide Logistics specializes in providing high touch, high value solutions. With exciting technological advancements to our systems, a new sales team on board as well as continued growth in our Aberdeen and Manchester operations, we are now well positioned for additional business in the UK market."

Celebrating their eighth anniversary in August, Crane Worldwide Logistics has seen tremendous growth since the company's inception in 2008, and now has 115 offices in 24 countries globally, including seven offices throughout the UK.

"We are excited to provide an even wider range of flexible solutions to our customers in the UK and to continue to grow in this market. We encourage anyone who would like to know more about the offerings at our new Heathrow location to please get in touch."
