

PRESS RELEASE

Issued: 27th November 2012

For Immediate Release

Air Logistics Group opens in Estonia

The global GSSA, Air Logistics Group, continues to expand its network with the recent opening of its 63rd office located in Estonia. The office is the latest addition to the extensive network Air Logistics has in Eastern Europe.

The office located in Tallinn, is being overseen by Henrik Spove, Regional Director Scandinavia & Finland and on a local level the office is managed by Eva Ehvart, Station Manager, Baltics. Eva has worked in the industry for over 19 years with key experience in the GSA business, as well as working for an airline, handling agent and freight forwarder.

“We have identified a gap in a growing market and feel that it is the right time to open an office in Tallinn. Furthermore the market seemed in need of a neutral GSA and by establishing an office in Estonia we can offer airlines a comprehensive sales and marketing strategy with added strength from our global network,” comments Henrik Spove, “We are excited by what the future holds for us in Estonia and look forward to building a recognised presence here, with plans to further extend sales to Latvia and Lithuania.”

Air Logistics Estonia represents the national carrier Estonian Air, operating narrowbody services to Europe and Russia, and offline carrier American Airlines.

The Air Logistics Group network now totals 64 offices across 40 countries, with offices recently opened in South Africa & Australia.
