## Benelux launch for P&O Ferrymasters double deckers

P&O Ferrymasters is boosting its hallmark tailor-made logistics capability with a state-of-the-art fleet of Mega double deck box trailers that feature a height-adjustable second loading floor.

With an average height of 1.4m per loading floor, the multifunctional trailers provide 27 metres of loading space for non-stackable palletised or packaged cargo - matching a standard trailer's capacity of up to 66 stackable pallets while staying within the 26-tonne payload limit. The double deck loading facility also minimises the risk of damage to lightweight commodities.

The company's first ten double-deckers are now in service for contract customers in the Benelux region. The purpose-designed box trailers were specified with anti-theft measures to serve demand for the carriage of theft-attractive goods.

Following the Benelux roll out, further units will be introduced across Europe in line with targeted market growth.
