

CSAFE GLOBAL ANNOUNCES NEW EUROPEAN COMPANY & ADDITION TO BUSINESS DEVELOPMENT MANAGEMENT TEAM

Issued by CSafe Global, 15 August 2013: To support the growing European and Middle Eastern Business, CSafe Global is pleased to announce a new European Business - CSafe Global Coöperatief UA, located in Schiphol, Netherlands.

To support the new business based in the Netherlands, Edwin Visser joins the team of CSafe Global Sales Directors in Europe. He brings over 20 years of sales, operations, and implementation experience in the freight and logistics industry.

Edwin will be based in The Netherlands, responsible for Eastern Europe including Austria, Italy, Netherlands, Germany and Poland. With this new European location, and the addition of Edwin to the business development team, CSafe Global enhances the customer service offering to work more strategically with Life Science cold chain customers.

Nadine Siqueland, VP of Sales for CSafe Global, comments: "Edwin is a great addition to our growing global sales organization. He comes to CSafe Global with an acute understanding of the cold chain market and its current challenges. As a tenured sales leader with extensive career experience in pharmaceutical airfreight transportation at companies including KLM and Kuehne + Nagel, Edwin's business building expertise will be invaluable as we meet the needs of an exponentially expanding CSafe Global's EU/Middle East business."

Edwin Visser can be contacted on + 31 6 30021899 or evisser@CSafeGlobal.com

About CSafe Global:

About CSafe Global:

CSafe and AcuTemp merged to become the world's largest producer of actively controlled mobile refrigeration units for life sciences, healthcare, military and international disaster relief agencies. CSafe Global now includes the AcuTemp brand passive packaging and hand held mobile carriers and the CSafe brand of active containers.

The active solution product assortment includes the CSafe RKN, the only compressor-driven air cargo container of its kind with approvals from both the US Federal Aviation Administration (FAA) and European Aviation Safety Agency (EASA). The RKN utilizes heating and compressor-driven cooling technology to eliminate the cost and the environmental challenges associated with dry ice transportation, refrigerated trucking and internal packaging and to allow the flexibility of uninterrupted routing of shipments without the need for special staging or dry ice handling.

CSafe Global's AcuTemp brand has provided more than 10 thousand hand-held mobile management solutions since its founding more than 25 years ago. CSafe Global is now proud to introduce a series of AcuTemp brand hand-held mobile couriers in popular payload sizes, durations and temperature profiles.
