

## **DSV Air & Sea expands everyday airfreight service to include the USA**

DSV Air & Sea has expanded its Everyday airfreight service from the UK to include all major destinations in the US. "We are able to offer assured capacity on flights with premium carriers and have also negotiated what we believe are some of the most competitive rates in the industry," says Richard Lawford, Sales Director, DSV Air & Sea Ltd. The Everyday service offers a range of daily and weekly airfreight services with a simplified door-to-door rate structure as low as \$1.50 per kilo.

"The regular, flown-as-booked services ensure our customers can always meet their delivery deadlines," says Mr Lawford. "Our competitive rates are all-inclusive, allowing our customers to more easily control their total costs." DSV Air & Sea's focus on the US-UK trade lane has recently been strengthened with the acquisition of SBS Worldwide, a UK-based forwarder with particular expertise in both air and ocean services between the US and UK.

"The US-UK trade has been identified as an area of strategic growth for DSV Air & Sea, so we are very pleased to be able to add the experience and skills of the SBS team to our own," explains Mr Lawford. DSV Air & Sea in the UK offers worldwide airfreight and seafreight services. Within the airfreight division, it also offers express and on-board courier services as well as full and part load charters. The Everyday service was launched last year between the UK and China / Hong Kong to offer daily services to these important Asian destinations. DSV Group is a top-ten global supplier of transport and logistics solutions with more than 22,000 employees in 75 countries. As well as DSV Air & Sea, the company has DSV Road and DSV Solutions divisions.
