Infinity Cargo Express implements CargoWise software solution

-New technology to further HK forwarder's push for higher value business-

Sydney, Australia May 23, 2012 — CargoWise®, a global leader in technology solutions for logistics service providers (LSPs) is pleased to announce that Infinity Cargo Express Ltd. has implemented its ediEnterprise software solution. The Hong Kong-based company has a network of offices across China handling exports to the US, Europe, Australia & New Zealand.

In pursuit of its goal to expand its operations around value-added lines of business, such as the import and storage of wines, ICE recognized a need for an improved IT system. Following an assessment of several options, CargoWise's ediEnterprise solution was identified as the best fit for the company's requirements. ICE's Emily Lau explains:

"We were enjoying success across our existing areas of business, but we wanted to offer our customers a range of value added services. To achieve this, we needed a more integrated business IT solution which is what we found in ediEnterprise."

Post-sales support was also important, Ms Lau continues: "CargoWise were great to deal with through the implementation process. They provided training and support which helped us to optimize the system to our business needs while managing a smooth and swift pathway to the go-live point."

Mike Coney, CargoWise's Vice President – Business Development Asia, commented "Infinity Cargo Express is a dynamic logistics provider with a great vision for the future. We are delighted in their confidence that ediEnterprise will allow them to become more professional and will help streamline their operations. The China specific features of ediEnterprise will give the flexibility Infinity needs to operate in two specific but conjoined markets.
