DSV Solutions to operate Eastern Europe Hub for Sealed Air

DSV Solutions in Slovakia was awarded a long term contract to operate Sealed Air warehousing and distribution operations from their facility in Senec, near Bratislava.

To facilitate the entire operation, DSV Solutions extended the current Hazardous Goods warehouse with an additional 10,000 m² of new warehouse from Prologis across the road. The hub will cover a large part of the European Supply Chain of Sealed Air and will be responsible for all order picking, distribution management and value added services.

DSV has a longstanding experience in the packed chemicals and cleaning products industry, and has already been serving the Sealed Air organization in a number of key markets in the region.

“DSV values Sealed Air as an important customer and very much welcomes its operation into our Senec facilities. With this contract we further underline our competence in consolidating Eastern European supply chains and effectively running regional distribution centers in the area” according to Brian Ejsing, CEO of DSV Solutions.

“Sealed Air has been looking for an Eastern Hub location to improve the service to our customers by consolidating inventories and streamlining processes. With DSV Solutions we have selected a partner responding to all requirements we were looking for.” explains Andreas Hillenkötter, Executive Director Planning and Logistics Europe.

ends
