

SAS Sharjah Aviation Services and Wallenborn extend strategic cooperation

SAS Sharjah Aviation Services and Wallenborn will enhance their strategic partnership. The newly entered agreement extends the successful cooperation between SAS and the Luxembourgish RFS supplier.

SAS and Wallenborn offer General Cargo and Temperature Controlled Airfreight Road Feeder Services to all main GCC airports and selected international destinations. The cooperation with Wallenborn includes 12 stations across the region and an annual RFS volume of some 130,000 tons of cargo.

Both partners will further focus on innovative RFS solutions to improve the quality and customer experience in transit and at Sharjah and clearance of air cargo shipments for the benefit of the involved industry.

Mohammad Al Zaghlawan, General Manager at SAS Sharjah Aviation Services, said on the extension of the cooperation: "Leadership in quality, reliability and efficiency are at the heart of our strategy and customer promise. We pride ourselves on the performance standards of our Warehouse Operations itself, and as a natural extension of our RFS services; is therefore that one of our most important decisions is the selection of our partners, and the commitment we jointly define. In the service industry this means that we truly live our partnership."
