L-3 Security & Detection Systems' eXaminer® EDS Receives New TSA Certification

WOBURN, Mass., March 5, 2013 – L-3 Security & Detection Systems (SDS) announced today that its eXaminer® 3DX and 3DX-ES explosives detection systems (EDS) have been certified by the U.S. Transportation Security Administration (TSA). These are the first systems to pass the TSA's rigorous new certification standard.

"This critical advance will continue to allow customers to screen for a wide range of new emerging threats as part of an ongoing commitment to passenger safety," said Thomas M. Ripp, president of L-3 Security & Detection Systems. "We deeply value our long-standing relationship with the TSA and have made a significant investment in working with TSA officials to equip our systems with capabilities that adapt to an ever-changing threat environment."

L-3 SDS has a comprehensive portfolio of internationally recognized explosives detection systems approved by TSA, ECAC and other global regulators. Its Standard 3 EDS solutions provide continuous flow CT technology using advanced automatic explosives detection technology and offer some of the lowest false alarm rates in the industry. From light- and reduced-size to medium- and high-speed systems, the eXaminer family accelerates the movement of passengers and bags.

Since 1998, L-3 SDS has used medical-grade imaging technology developed for aviation security with an understanding of the complex demands faced by airport personnel and regulatory agencies around the globe. Over 1,000 eXaminer systems have been deployed at airports domestically and internationally and are supported by L-3's world-class service organization.

About L-3 Security & Detection Systems

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and high-energy X-ray; active millimeter wave imaging; metal detection; and energetic trace explosives detection. Our solutions

are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and intellectual property. To learn more about L-3 SDS, please visit the company's website at www.L-3com.com/sds.

About L-3 Communications

Headquartered in New York City, L-3 employs approximately 51,000 people worldwide and is a prime contractor in C³ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems, aircraft modernization and maintenance, and national security solutions. L-3 is also a leading provider of a broad range of electronic systems used on military and commercial platforms. The company reported 2012 sales of \$13.1 billion.
