

Yusen Logistics Enhances Temperature-Controlled Facility in Indonesia

PT. Yusen Logistics Solutions Indonesia has enhanced a 650-square-meter temperature-controlled storage area in its 20,000-square-meter warehouse in Bekasi.

The storage area provides logistics services, including stock storage and packing, as well as distribution processing, for electronic and electrical equipment which require temperature control management.

Located in the suburbs of Jakarta, the facility also houses automotive and chemical-related products.

In addition to strict management of the temperature in the storage facility 24 hours a day, 365 days a year, there is also a high-security system with 24-hour monitoring through CCTV cameras so that an all-encompassing service can be offered.

By combining the Group's warehousing capacity in Indonesia (*) with Yusen Logistics' ocean and air freight forwarding, truck delivery, and customs clearance operations, the company will continue providing high-quality logistics services.

Temperature-Controlled Facility
