## **Yusen Logistics UK invests in Top-range Container Tracking Technology**

**Yusen Logistics UK has invested in new, state-of-the-art real-time tracking technology, specifically designed to track and measure the temperature, humidity and location of dry and refrigerated freight containers. The system also monitors risks such as irregular door activity and shock impact and has inbuilt geo-fencing functionality.**

Designed to be fitted to the door of any standard ISO container, the ISO9002 accredited system ensures that sensitive cargo or high value shipments are stored and transported securely in the optimum conditions.

With full end-to-end reporting, including interval and event-based SMS and email alerts, in addition to location and status tracking via an online web portal, the solution gives customers full visibility of their products at every stage from the point of loading. Accurately plotting urgent consignments across routes covering 53 countries, the system enables Yusen to service the needs of its customers with increased reliability across its global network.

The investment in the new technology demonstrates Yusen's constant commitment to providing the optimum service to its customers, offering the enhanced tracking service across international supply chains.

**ENDS**

**Wednesday 15<sup>th</sup> July 2015**

## **NOTES TO EDITORS**

### **ABOUT YUSEN LOGISTICS**

Yusen Logistics is a leading provider of contract logistics and air/ocean freight forwarding. Offering a truly global, total logistics service, the company provides warehousing, distribution, freight forwarding and supply chain management services. The company's European region employs some 4,300 employees and operates 77 facilities with over 670,000 m2 of warehousing space throughout Europe, from Spain to Russia. The global headquarters of Yusen Logistics is Tokyo, with other regional headquarters for East Asia, South Asia/Oceania and the Americas.
