

CLN, in Global Partnership with the Leading International Logistics Software Provider

By: Raizza Santos

Hong Kong SAR, China – The Combined Logistics Networks

(www.combinedlogisticsnetworks.com) has finalized a global partnership with CargoWise (www.cargowise.com), the leading international logistics software provider with regional headquarter in the US, UK, Singapore, China and Australia.

ediEnterprise from CargoWise is widely recognized around the world as the leading logistics solution in the industry. With more than 5,000 sites in over 100 countries, CargoWise is the software provider of choice for multi-national and national freight forwarders, customs brokers, NVOCCs, 3PL & 4PL Contract Warehouses, Container Freight Stations, Local Transport and Shipping Agency Services.

In fact, CargoWise is already the main software provider for the CLN with 9 member companies in 3 countries and 10 cities currently using their ediEnterprise system.

ediEnterprise is not only the most feature rich solution available, it is specifically designed to enable global networks like ours to work together in the most efficient most efficient and productive way. By integrating all members in the network with real time exchange of high quality data, we gain a competitive advantage with Similar IT capabilities to the largest multi-national logistics companies. The most efficient way to realize this potential would be for all members to be on the same ediEnterprise platform.

This global partnership with CargoWise is a strategic initiative of CLN to strengthen and grow the network by making it easier and more efficient for CLN members to work with each other thereby improving the productivity and competitiveness of the entire network. This partnership with CargoWise entitles CLN members to exclusive discounts on the software not available to non-members.

More exclusive offers and discounts are expected following this partnership with CargoWise.
