

eFreight360®

THE WORLDS FIRST TRULY *PAPERLESS XML AIR FREIGHT* DOCUMENTATION SOLUTION

Try eFreight360 for Free - Click [Here](#)

1 - Automatically Complete All ePouch Shipping Documentation: Pre-Fill without re-keying any shipping document including eAWB's, House Way Bills, House Manifests, eCSD's and much more. Electronically transmit the resulting XML based "Paperless ePouch" to any amount of stakeholders. No more missed flights due to late arriving, lost and incorrect documentation.

2 - Maximizes Profits: eFreight360 gives users the ability to evaluate multiple quote alternatives to increase their profits. Send and receive multiple open standard eAWB messages to 150 airlines and receive air freight booking confirmations in a flash. Maximize profits per shipment. **Save up to \$25 per shipment in paper AWB Surcharges!!**

3 - Affordable to all: Offers all stakeholders a system they can afford. Produces an immediate positive ROI. eFreight360 gives our customers the visibility to maximize profits on every shipment.

4 - Shippers Data Easily Imported: eFreight360's powerful **API** makes it easy to import any digital shippers data such as packing lists, and eliminates re-keying. Captures and communicates information in XML format to individuals via forms and computer systems via SmartData. Eliminates the need for expensive and unreliable scanning/OCR.

5 - Full IATA e-Freight Compliance: Meets and substantially exceeds all IATA e-Freight initiative requirements, and contains all XML based IATA Air Freight shipping forms ready to use. We can easily add any special forms you may need! All forms can contain your logo.

6 - Plays nice in your existing sandbox: Augments and easily integrates into existing data bases and enterprise systems - does not attempt to replace them. Offers the right tools for the right task. **If you would like to integrate our core SmartForms**

technology into your existing enterprise systems we can do that also.

7 – Mobile is a must: Fully supports all mobile and desktop devices. Allows any stakeholder to engage the process on the device of their choice, thereby enhancing the users experience, satisfaction and loyalty.

8 – eAWB Documentation in Multiple languages: Write once and automatically deploy forms in the world's most popular languages and alphabets. Research shows this single capability can improve data input quality by more than 75%.

9 – Protects you: Guarantees military level security throughout the system processes,

10 – Understands people make mistakes: Helps people enter data correctly the first time by using embedded rules and help functions via XML authoring tools.
