Contact : Pasi Kuusijärvi – Director of Project Logistics

Nurminen Logistics is a listed company established in 1886 that offers logistics services. The company provides high-quality railway transports, project transport services, special transports and forwarding and cargo handling services to its customers. The main market areas of Nurminen Logistics are Finland, Russia and its neighbouring countries.

Project Logistics:

Nurminen Logistics offers project transport services related to major industrial investments. In addition to transportation and documentation required in international transport projects, the service covers the overall management of the project's transport logistics. Project services are always tailored to conform to the individual needs of the customer and ongoing project.

Special Transports:

Nurminen's special and heavy transport services are tailored individually for each customer. Nurminen's experts help the customer to plan their project and optimize the transport item sizes often long before a transport

agreement has been made. During tender calculation, we select the best suited vehicle for transport, plan the route and create a preliminary schedule for the transport.

Proper planning can generate considerable cost savings for the customer. When selecting a partner for special and heavy transport, make sure your partner plans the transport carefully, obtains all necessary permissions and secures the load with due care.

We welcome Nurminen Logistics to the XLP team!

About XLProjects Network!

XLProjects is a non-exclusive network of independent project forwarders and project charterers who are defining today's project logistics industry and will continue to do so in the coming years. XLProjects is run by people who understand the needs of project forwarders and charterers, but also know how to run the network.
